Bentley Turner
University of Manitoba

Dear Bentley,

Thank you for presenting on your coupled oscillator research and general undergrad experience to my classes today. Your visual presentation, clear speaking style, and upbeat personality were engaging to the audience of young science students. They appreciated hearing about the university experience from students just a few years older than themselves.

I was impressed by your insights, your passion for your area of research, and your personable responses to questions. You are an excellent ambassador for your university program, a tribute to our high school as an alumnus, and an excellent representative of science education in general.

I would also like to thank you for reaching out to me in the first place and organizing the other members from your graduating year to come back and speak at their alma matter. I am proud to have had the opportunity to have taught you and can't thank you enough for coming back and sharing with us!

Sincerely,

A handwritten signature in black ink, appearing to read 'Greg Johnson', written in a cursive style.
